

# Maryland Engineering Challenges 2018 Paper Airplane Challenge

Elementary Level – Grades 1 to 5

*Each grade will be judged separately.*

Supported

By:

American Institute of Aeronautics and Astronautics,  
Mid-Atlantic Section

Engineer Contact:

Tom Milnes [thomas.milnes@jhuapl.edu](mailto:thomas.milnes@jhuapl.edu)

## Important Dates

### Coaches' Information Session

⇒ **Thursday, November 16, 2017** **4:00 p.m. to 7:00 p.m.**

This “drop-in” event is designed for adults interested in coaching a team to stop by and chat with engineers. Find out if a particular Challenge is a good fit for your students. The Information Session is not required and there is no cost. Registration is strongly encouraged. Contact James at [jkeffer@thebmi.org](mailto:jkeffer@thebmi.org)

### Registration and Written Report Due

⇒ **February 17, 2018** **Prior to 4:00 p.m.**

In order to be a registered team, each team must have their adult Coach do the following:

- Register online at <http://survey.constantcontact.com/survey/a07eekcihgzi7939g1n/start>
- AND submit the team's Written Report as a HARD COPY to the Baltimore Museum of Industry
- AND pay a \$5 Coach's Fee, details at <https://48278.blackbaudhosting.com/48278/MEC-Coach-Fee>

### Paper Airplane Competition

⇒ **February 25, 2018** **Doors open at 9:00 a.m.**

Full details about the Challenge will be emailed to Coaches after the registration deadline.

**Questions about Challenge specifications or judging should be sent to the Engineer Contact:**

Tom Milnes [thomas.milnes@jhuapl.edu](mailto:thomas.milnes@jhuapl.edu)

**Other questions?**

James Keffer [jkeffer@thebmi.org](mailto:jkeffer@thebmi.org)

## THE CHALLENGE

The Lilliputians, a race of tiny people first discovered by that intrepid traveler Gulliver, guard BWI airport from the dreaded Gremlins, a mischievous sort of tiny creature who delight in jinxing pilot, plane, and traveler alike (see the Bugs Bunny classic, "Falling Hare").

Lilliputians subdue Gulliver

The dreaded Gremlin.

The Lilliputians are looking for a reliable paper airplane that their human handlers can use to send them where needed to defend the airport. The Lilliputians are looking for a design that can be manufactured quickly but reliably by assembly line techniques. The planes must be easy enough to be thrown far, fast, and accurately by elementary school students. Paper clips will serve as surrogate Lilliputians for testing purposes.

## ENGINEERING TEAM REQUIREMENT

Each team should consist of at least four students. Only 4 pre-chosen students may construct and throw planes at the competition. Teams may share students at the same grade level or use younger grade students if needed to have at least 4 students on a team. There is no limit to the number of teams a school may have.

## DESIGN AND CONSTRUCTION STANDARDS

At the competition, each team must use the piece of 8.5" x 11" paper (*20-pound or 75 grams/meter<sup>2</sup>*) and jumbo paper clip (*Acco Premium Silverette Jumbo Paper Clips #72503, or equivalent*) provided by the sponsors.

- Only one piece of paper and one paper clip allowed per plane (unlimited number of scraps).
- No tools or construction materials other than the paper and paper clip provided.
- Three minutes will be given for four students to construct four identical paper airplanes by assembly line method.
- All four students must be involved in the manufacturing process.
- No coaching or other adult help fabricating the paper airplane will be allowed during the performance competition.
- Paper clip must remain attached to or inside the airplane for flight to count. One re-throw allowed for lost passenger.

## PERFORMANCE DEMONSTRATION GUIDELINES

Each of the four students must fly a plane. Individual score is Length x Speed x Accuracy. Team score is sum of individual scores.

- Length = Length of Flight
- Speed = Length of Flight / Time of Flight
- Accuracy = 1 - Distance from Reference Line / Length of Flight

Paper clip must remain attached to or inside the airplane for flight to count. One re-throw allowed for lost passenger.

## EVALUATION STANDARDS

This elementary school-level competition involves four main components: the design and construction of the project, a written report, an oral report, and the performance demonstration.

- |   |                              |
|---|------------------------------|
| 1. Design & Construction  | Competition value: 20 points |
| 2. Written Report   | Competition value: 30 points |
| <i>Each TEAM should complete the "Student Design Report" at the end of this document.</i> |                              |
| 3. Oral Interview   | Competition value: 20 points |
| 4. Performance Demonstration  | Competition value: 30 points |

An outline of what is required for each of these components, and general guidance on preparing for the competition, is given in the "Elementary School Guide to Entry" which should be read in connection with this document.

**GOOD LUCK TO YOUR TEAM!**

## STUDENT DESIGN REPORT

Team Name

We are (please check one):

Grade One: \_\_\_ Grade Two: \_\_\_ Grade Three: \_\_\_ Grade Four: \_\_\_ Grade Five: \_\_\_

Team Members

Team's School Name (if applicable) and County

Adult Coach

Coach's Email

### DESIGN REPORT DIRECTIONS

Make a copy of the "Student Design Report" pages for each TEAM. Team members should complete each part by clearly printing the requested information. Additional pages may be inserted as needed. The information in this booklet must be the work of student team members, as certified on the final page.

**Written reports must be submitted, either by mail or in person, to:  
BMI, 1415 Key Highway, Baltimore MD 21230, prior to 4:00 p.m. on February 17, 2018**

Explain why you chose your first design for an airplane. *Include a sample of this design.*

---

---

---

---

---

What problems did you encounter with your first design?

---

---

---

---

---

Explain the improvements or changes made to your design after testing. *Include samples of improved designs,* and explain how they were better

---

---

---

---

---

---

---

Explain which design is the best.

---

---

---

---

---

---

---

---

How successful is your best plane?

---

---

---

---

---

---

---

---

What math skills were needed in this challenge?

---

---

---

---

---

---

---

---

What science skills were needed in this challenge?

---

---

---

---

---

List the safety rules you followed to make sure no one got hurt:

---

---

---

---

---

What did you learn by taking part in this project?

---

---

---

---

---

---

---

---

What did you enjoy most about taking part in this project?

---

---

---

---

---

---

---

---

List dates of important milestones in your project and describe those milestones:

---

---

---

---

---

---

---

Resources: List all the information resources used to solve the challenge problem. Include books, pictures, and websites.

---

---

---

---

---

List the materials used in constructing your project:

Materials

Cost

Tools Used

---

---

---

---

Explain what help adults gave your team:

Name

Type of Assistance

---

---

---

---

---

Team Members: List the team members, with a short description of how each person helped to make the project a success. What special skills were learned or demonstrated by each person?

---

---

---

---

---

---

---

**TO BE SIGNED BY ALL STUDENTS, ADULT HELPERS, AND TEAM COACH.**

We hereby certify that the majority of the ideas, design, and work was originated and performed by the students, with limited assistance by adults, as described above.
