

ACTIVITY NO. 01

TOOLS NEEDED:

DESIGN A LABEL

In 1910, Noxzema, "the miracle cream of Baltimore," was invented by Dr. George Bunting, a local pharmacist. After much mixing and testing, he introduced the cream to the market in a blue jar — similar to the way it is still sold today! The blue bottles are something that help make the brand famous.

Now, it's your turn. Help Dr. Bunting design a new Noxzema label!
